PROFESSIONAL SUMMARY

Business Intelligence Analyst with experience building **data products, analytical pipelines, KPI dashboards, and AI-enabled workflows**. Combines business analytics with hands-on development in **SQL, TypeScript, PostgreSQL, and AWS**, plus Python-based analysis and research. Experienced translating business requirements into structured datasets, data-quality controls, and applications that support contract review, operational monitoring, and business decisions.

SKILLS

Data & Analytics: SQL, Python, PostgreSQL, MySQL, Tableau, Power BI, Excel, Data Modeling, ETL, Data Validation
Statistics & ML: Regression, Classification, Time Series Forecasting, Imbalanced-Data Resampling
Engineering: TypeScript/JavaScript, Next.js, React, REST APIs, AWS Lambda, SQS, Step Functions, RDS, CloudWatch, Redis, Docker
Applied AI: LLM APIs, RAG, Embeddings, Semantic Search, Entity Resolution, Pinecone, Model Evaluation
Business & Delivery: Requirements Analysis, KPI Development, Workflow Automation, UAT/Testing, Jira, Git/GitHub

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst | Samvid, Inc. - Pleasanton, CA Jul. 2025 - Present

- Translated business requirements across **1,000+ contracts** into structured datasets and lifecycle analytics for contract review, renewal tracking, and reporting; **validated outputs** with legal, sales, and engineering teams.
- Re-architected contract-processing workflows using **AWS Lambda and Step Functions**, reducing end-to-end extraction from **~30 minutes to under 3 minutes** and moving processing out of the web application.
- Built **Contract Intelligence and Partner 360 dashboards** with lifecycle metrics, **90-day renewal/expiration tracking**, filters, and data-quality controls to support renewal follow-up and customer analysis.
- Developed **operational dashboards and monitoring workflows** across production and test environments, bringing service health, logs, performance metrics, and alerts into a shared interface for troubleshooting.

Applied AI Engineer (Practicum) | Armanino LLP - San Jose, CA Feb. 2025 - Jun. 2025

- Led technical implementation within a **four-person graduate practicum team**, building ingestion, retrieval, and synthesis workflows with **Python, OpenAI, and Pinecone** across **10+ automotive ESG reports**.
- Evaluated **20+ sponsor-provided questions**, compared RAG with a non-RAG baseline, and analyzed cross-report inconsistencies; delivered **source-grounded answers with traceable citations** and evaluation findings.

Digital & Technology Solutions Intern | MGM Macau - Macao S.A.R. Jul. 2024 - Aug. 2024

- Supported **casino and hotel operational systems, enterprise applications, user access, and Power BI reporting** in a 24/7 business environment, working with frontline departments to resolve system and operational issues.
- Resolved **30+ daily incidents and service requests**, coordinated issue follow-up across teams, and consistently ranked among the team's **top three performers**.

SELECTED PROJECTS

Contract Intelligence | Next.js, PostgreSQL, AWS, Redis 2025 - 2026

- Implemented **asynchronous extraction and batch orchestration** with Lambda and Step Functions, persisting structured results in PostgreSQL and adding reprocessing capabilities to refresh downstream contract data.
- Developed **hybrid embedding + trigram entity resolution**, fallback matching, and Redis-backed distributed locking to reduce duplicate partner creation during concurrent processing; implemented **organization-scoped data access** to keep contract and partner queries tied to the appropriate workspace.

Samvid Admin Portal (Internal Tool Platform) | Next.js, AWS, CloudWatch, PostgreSQL, Redis 2025 - 2026

- Built an internal **multi-environment operations platform** combining service-health views, a topology overview, CloudWatch logs, Lambda metrics, and API analytics for system monitoring and investigation.
- Implemented **adaptive performance baselines using historical CloudWatch metrics** and email/SMS alerting with history, routing, snooze, and deduplication to identify abnormal Lambda behavior, manage repeated notifications, and support operational troubleshooting.

SCU Spring Analytics Showdown - 2nd Place | SQL, PostgreSQL, Tableau 2025

- Led a team analyzing **24 PostgreSQL tables** to identify payment delays, client disengagement risks, and regional performance gaps.
- Built and reviewed **KPI-driven Tableau analyses**, reconciled findings across workstreams, and presented data-backed recommendations to faculty and industry judges.

U.S. Candy Distribution Dashboard | Tableau 2025

- Built an **interactive Tableau dashboard** analyzing sales, profitability, regional performance, and seasonal trends; translated findings into **marketing and operational recommendations** to support business planning.

LEADERSHIP & RECOGNITION

Competition Judge | Bay Area Data Science Competition 2026

- Evaluated seven finalist teams across problem definition, data use, analysis, interpretation, and proposed solution; contributed technical Q&A and award selection.

EDUCATION

M.S. in Business Analytics | Santa Clara University - Santa Clara, CA Sep. 2024 - Dec. 2025
B.S. in Business Intelligence and Data Analytics | University of Macau - Macao S.A.R. Aug. 2020 - Jun. 2024
